

# OHA ANNUAL MEETING 2023

## CLINICAL QUALITY & PATIENT SAFETY SCHEDULE

Day	Time	Presentation Name	Description	Presenters
Monday	8-9 a.m.	Making Mortality Grand Rounds “Grand” Again: A Key Performance Indicator	With a targeted focus on interdisciplinary collaboration, BSMH embarked on a journey toward improving patient safety through an innovate approach. Recognizing the toll that COVID-19 had on associates, it was time to do something that had never been done before. A nurse-led team facilitated a series of collaborative sessions, with a call to action from all disciplines.	Katrina Moog, MSN, RN, CPHQ, manager, Care Reliability, Bon Secours Mercy Health  Roberta Azzo, MHA, reliability engineer, Bon Secours Mercy Health
Monday	9:45-10:45 a.m.	Building Clinical Quality in Acute Care	This session will explain how to drive change and advance quality across disciplines in acute care.	Mark Slabinski, MD, FACEP, FAAEM, regional vice president of the US Acute Care Solutions North division
Monday	2-3 p.m.	Improving Sepsis Care Quality: How a Dedicated Program and Multi-Disciplinary Collaboration Changes the Game	Attendees will learn how Summa Health System implemented and developed a dedicated Sepsis Program. This includes: development of the program’s infrastructure, goals, multi-disciplinary team and interventions. Data outcomes showing improvement as a result of the Program will be shared.	Michelle Evans, RN, MSN, APRN, NP-C, Sepsis Program coordinator, Summa Health System
Monday	3:15-4:15 p.m.	When 1+1 = 90	Attendees will become knowledgeable about how combining specific strategies aimed at improving the patient and family experience creates an additive effect that is greater than the sum of their parts.	Amy Helder, MS, ACHE, administrative director, The Ohio State University Wexner Medical Center  Sharon Santoso Clark, MD, FACP, FAAP, FHM, assistant professor of Internal Medicine and Pediatrics, director of Patient Experience, associate medical director, University Hospital, The Ohio State University Wexner Medical Center Section Chief of Adult Hospital Medicine, Nationwide Children's Hospital
Tuesday	8-9 a.m.	The S.P.O.T. Patient Fall Prevention Program	The structure of the SPOT fall program is based on Safety, Prevention, Observation and Teamwork. A culture of safety is the fundamental pillar for a successful fall prevention program. The remaining pillars will be discussed and strategies to implement and monitor for effectiveness will be provided.	Terry R. Winemiller, BSN, RN, CPHQ, senior improvement RN, Clinical Risk & Patient Safety, University Hospitals, St. John Medical Center
Tuesday	9:45-10:45 a.m.	Achieving Performance Improvement Through Advanced Analytics and Process Transformation	In this session, presenters will use cases where UC Health was able to successfully improve patient movement, increase capacity, increase surgical volume and reduce delays using a combination of advanced analytics and process transformation. We will also describe how AI can be used to model patient flow and allow for optimal resource allocation. Finally we will show how similar analytics can be used to reduce health disparities and increase patient experience.	Jamie McGlothlin, PhD, director, Health Care Analytics national lead, RSM US LLP  Tyler French, assistant vice president, UC Health
Tuesday	2-3 p.m.	Strategies to Implement Public Access to Naloxone: A Ground Zero Rescue Response	Attendees will gain an understanding of: the role naloxone plays in reversing opioid overdose; strategies for distributing naloxone to the general public through multiple venues; legal considerations and potential barriers to implementing public access to naloxone; and best practices for training the public on naloxone administration.	James Hubbard, paramedic, PEND project coordinator, ProMedica Health Systems

Tuesday	3:15-4:15 p.m.	Decreasing the Tension with Treating Maternal Hypertension	Maternal hypertension is on the rise. OhioHealth Mansfield has committed to improving recognition and timely treatment for pregnant mothers and those mothers in the postpartum period. Providing an overview of baseline data, quality improvement initiatives and the impact on improving patient outcomes related to maternal hypertension will be highlighted.	Nicki Scott, MSN, BSN, RN, C-EFM, director, women's health, OhioHealth Mansfield  Terry Grogg, MD, obstetrics and gynecology physician, OhioHealth Physician Group, OhioHealth Mansfield
