

Jon E. Utech is the Senior Director of the Office for a Healthy Environment at Cleveland Clinic, where he develops sustainability strategies to emphasize the triple bottom line. Jon directs the Clinic's sustainability program covering energy demand reduction, carbon neutrality, climate resilience, green building, recycling, sustainable food, greening supply chain, tree planting, engagement and reporting. Jon leads the organization's climate action which includes policy engagement, climate resilience, energy efficiency and renewable energy. Jon is a carbon accountant and has calculated and published Cleveland Clinic's carbon footprint since 2014. Jon serves on the Healthcare without Harm Climate Council, Healthcare Sector Steering committee for the Better Climate Challenge, National Academy of Medicine Climate Collaborative Working Group, and Evergreen Cooperatives. Jon's team works to engage Cleveland Clinic caregivers and the community in this effort to support the overall goal of improving environmental health and human health. Jon has also led Cleveland Clinic's ESG reporting since 2013 reporting annually with a hybrid UN Global Compact/GRI report.

Jon earned an MBA and MPOD from Case Western Reserve University and a BA in History from Dartmouth College.
