

Hospitals Are Major Economic Drivers

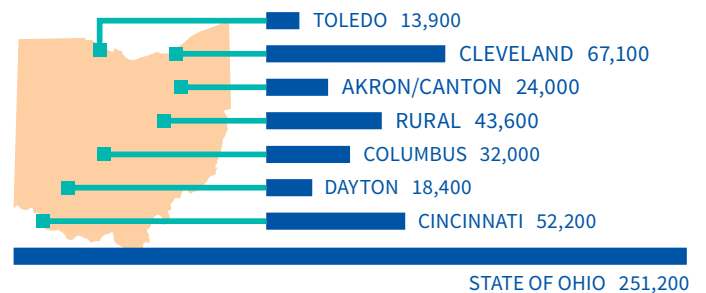

\$93.5 billion

generated by Ohio hospitals annually in economic impact.

REGIONAL ECONOMIC IMPACT

REGIONAL DIRECT EMPLOYMENT (EMPLOYEES)

Economic Impact Calculated Using 3 Core Employment Factors

Total impact on state and local economies is measured by looking at the direct, indirect, and induced impacts of the hospital industry.

- Direct impacts are those that come directly from the hospital industry itself—a hospital employee receives a paycheck from the hospital.
- Indirect impacts are those that come to businesses contracted by hospitals—a laundry service is contracted by the hospital to clean its bed linens.
- Induced impacts are those created by hospital employees spending their money.

Direct + Indirect + Induced = Total Impact

251,200 Ohioans
EMPLOYED BY HOSPITALS

More than \$19.9 billion
IN DIRECT WAGES PAID BY HOSPITALS

Additional 289,000 jobs
AND \$15 BILLION IN INDIRECT AND INDUCED WAGES
SUPPORTED BY HOSPITALS

STATE INCOME TAXES COLLECTED FOR DIRECT
EMPLOYEES

\$628 million

ABOUT THE DATA

Economic Impact is defined as the sum of the direct, indirect, and induced output, or total value of production, of the hospital industry in the state of Ohio. Economic data is from 2019 extrapolated to dollar amounts for 2021. Direct employment data is from the U.S. Bureau of Labor Statistics average of the most recent 12 months (May 2020 through April 2021).
